State of the Tizen Community
May 8, 2012

Dawn Foster
Open Source Community Manager for Intel
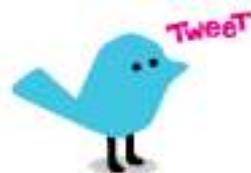

@geekygirldawn

dawn.m.foster@intel.com

- September: Announced formation of the Tizen project
- January: First code and SDK published (alpha)
- February: Beta code and SDK published
- April: Tizen IVI code available
- May: Tizen 1.0 code and SDK
- May: First Tizen Conference

Learn More: tizen.org/blogs

- Source code available for
    - Mobile devices (smartphones and tablet devices)
    - In-vehicle infotainment (IVI)
- Tizen SDK for Windows & Ubuntu
    - Web IDE
    - Emulator
    - Toolchain
    - Sample apps
    - Documentation
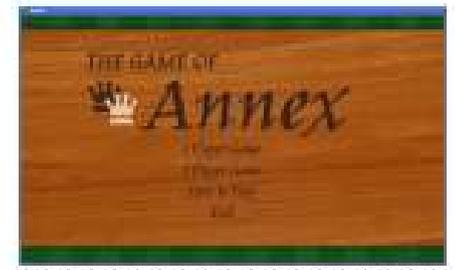

Learn More: source.tizen.org & developer.tizen.org

- Rapid Interface Builder
  - Browser-based design tool for prototyping and UI creation for web applications.
  - Layout your UI by dropping widgets onto a canvas.
  - Export the generated HTML and Javascript.
- Web Simulator
  - Lightweight tool for developing mobile web applications.
  - Enables running and debugging web APIs for a variety of mobile platforms.
  - Supports the Tizen 1.0 Web API.
- Online functional previews (no installation required)
- Fully open source projects that you can contribute to

**Learn More: 01.org/rib and 01.org/web-simulator**

- Community includes all of the people who work on or with a project

  - **Product contributors:** kernel / distribution developers, release managers, quality assurance, localization, etc.

  - **App developers**: writing applications to run on devices

  - **Users**: people who run it on their device and provide feedback

  - **Vendors**: companies creating products based on the platform

  - **Other contributors**: promotion, moderation, documentation and more

Some people contribute as part of their employment at companies, while others contribute free time. The community includes all of the people who are doing interesting work on these projects.

Tizen Community Challenges

- Interest in Tizen is Low
  - Need consumer devices in the market for people to get excited about
- Lack of Applications
  - Developer devices available tomorrow
  - Continue improvements to SDK (add other OSs)
  - HTML5 development is relatively new
  - Still working on finishing the plan for an app store
- Community / Developer Burnout
  - Asking community to support one more thing
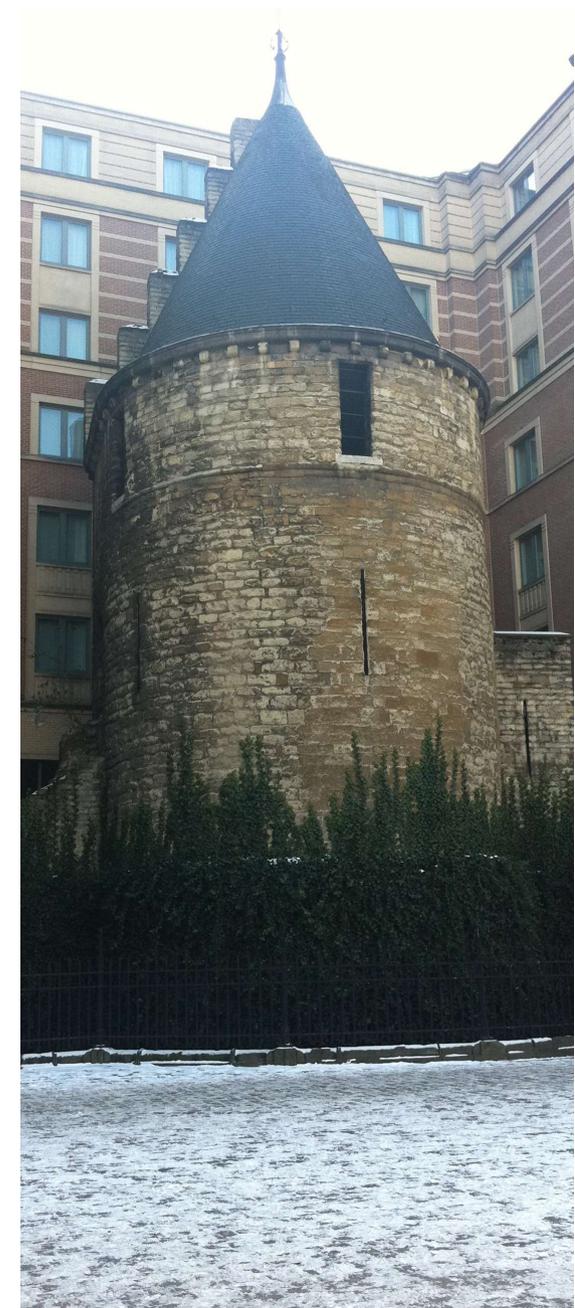

- Device Manufacturers / Operators
  - Need to build devices using Tizen
  - Need successful devices in the market that consumers can get excited about
- Application Developers
  - Large application ecosystem needed to be successful
  - Get developers started now while we finish getting the store ready.
- Not ready to focus on end users
  - Nothing for them to use yet

- Use the SDK to build applications and file bugs
- Write HTML5 apps for Tizen
- Use & contribute to tools like RIB & Web Simulator
- Add documentation to the wiki to help others
- Ask or answer questions on the mailing lists and IRC
- Build products / devices on Tizen

Learn More at tizen.org/community

Enter the Tizen Developer Contest: Sponsored by Intel

Intel AppUp* developer program

- Prizes:
  - $50 gift cards for the first 50 eligible entries
  - Three monthly prizes of a 480 GB SSD drive
  - Grand Prize is an Intel Core* i7 desktop PC.
- Post a comment related to app development for Tizen devices.
- To be eligible, your comment must be at least 100 words long and
- Include one of the following:
  - A testimonial on experience developing a Tizen app.
  - Recommendations and/or product improvements for future releases of Tizen and/or product improvements
  - A solution to a specific challenge in Tizen development
  - Advice or a demo on how to write an app for Tizen
  - Porting an existing app to Tizen
  - Using the Tizen SDK
- Read Terms & Conditions for the fine print :)
